Fostering ethical competence in business schools
A design-based research study

Project aim

The aim of the project is to

- develop an (pedagogical) intervention
- to foster ethical competence
- in lectures and seminars of business schools

Research method

Design-based research...

- not only describes what already exists but also discovers what is possible
- develops a solution for a (urgent) problem
- generates global design principles for a range of similar issues
- connects theory formation, theory testing and theory application

Theoretical frame of reference

(Research) context

- Individual teaching & learning conditions
- Organisational & social framework

Teaching process

- Interaction
- Learning process

Desired outcome

- Ethical competence in business schools
